DETAILED ACTION

EXAMINER'S AMENDMENT

1. The application has been amended as follows: in the Preliminary Amendment filed on 21 October 2003, page 2, at the end of the paragraph, delete the period "." and insert ---, now U.S. Patent No. 6,693,530. ---

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: there are no prior arts teaching or suggesting of a communication network-based method of administering a remotely located security system, the method comprising the step of:

receiving at a security system platform disposed in the communication network, a surveillance profile from the remotely located security system regarding a piece of security equipment that has detected a security breach;

dispatching emergency services corresponding to the surveillance profile of the security equipment, wherein

the step of receiving the surveillance profile from the remotely located security equipment includes receiving information identifying the detected security equipment as at least one of a video camera, motion detector and heat detector, and further includes receiving at least one of registration information corresponding to the detecting security equipment, a location of the detecting security equipment and a physical description of the contents of a room in which the detecting security equipment is located.
